

Protective Camera Housing A-CH412

*Mount included with camera

Product Summary

The A-CH412 Protective Camera Housing is intended for use with the ViewPro™ A-C3BP and A-C4CP compact series cameras as a tamperproof protective housing. The unit offers protection from dust accumulation, dirt and occasional splashes, but is not intended for outdoor use in the extreme environments where condensation might occur within the housing.

Features

- High-impact plastic construction.
- Weather-Resistant front window seal protects camera from splashing around areas such as swimming pools.
- Large rectangular cable port with grommet for two 6-pin cables.
- Light gray finish blends with surrounding equipment and installation aesthetics.
- Clear front window does not affect light level performance of camera.
